

# AdmiCash restoration on a new computer or operating system

In case you need to change your PC or operating system, the question arises of how to restore AdmiCash settings and data on the new device. This document explains you the two variants available in AdmiCash to do so.

Depending on the initial situation one of the two variants below is to be chosen:

- **One-to-one copy of the entire AdmiCash installation**

This method requires **that the original PC is still working and available**. The whole installation, including settings, data and licence information, is copied and transferred to the new device.

- **License restoration on the new device/system**

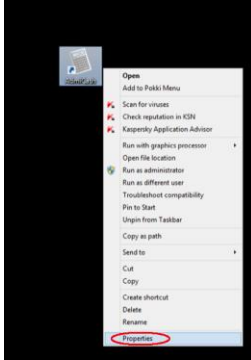

In case the original computer is not available, **the setup of AdmiCash has to be done via the licence restoration and the import of a current data backup** on the new device. The condition for this method is therefore the existence of a current data backup.

Both variants guarantee you the error-free transmission of your personal AdmiCash installation. Please follow the instructions as they are given down below. Please note, that any manual input beyond the functions provided by AdmiCash may lead to loss of data.

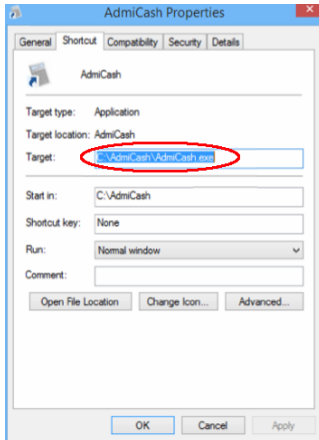

## One-to-one copy of the entire AdmiCash installation

Perform the following steps for the One-to-one copy of AdmiCash:

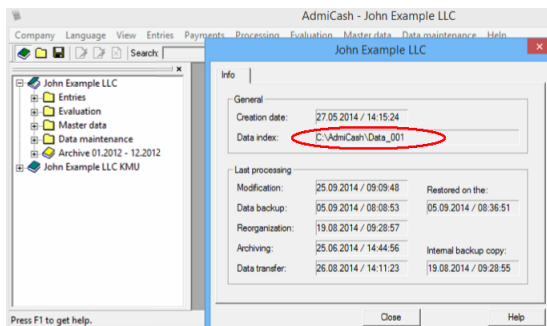

- Start your original computer. Right-click on the AdmiCash icon and choose the position **Properties** from the menu to show the installation directory.

- The dialogue **Properties** is now displayed:

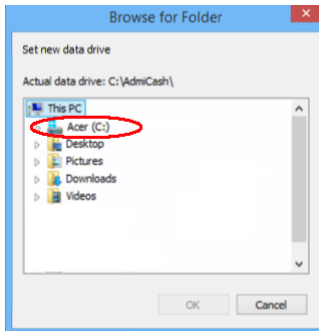

- Verify the installation's storage location.
- Open AdmiCash, as well as one of your companies. Choose the menu **Company – Properties** and check if the data's storage location is identical to the program's one.

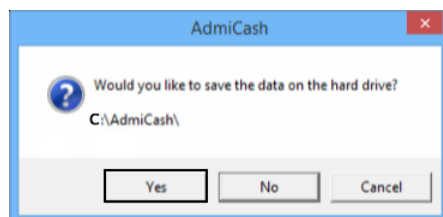

**In cases of doubt or problems, please directly contact our [Support](#). Any manual copying and moving of information outside the functions provided by AdmiCash may lead to loss of data.**

If the AdmiCash installation and data were stored in different places, you should concentrate them on a new drive (normally C:). For the **Set data drive** use following functions of AdmiCash:

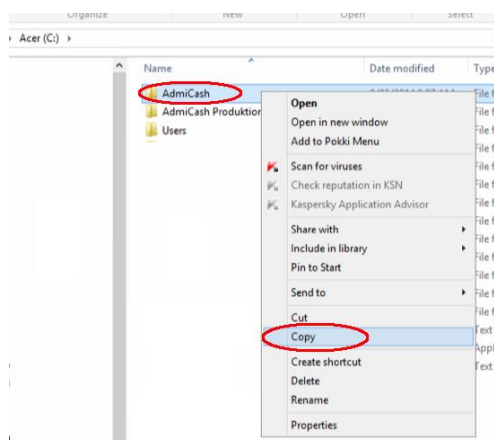

- Start AdmiCash.
- Choose the menu **Company – AdmiCash Setup – Set data drive** for to display the dialogue **Browse for Folder**.

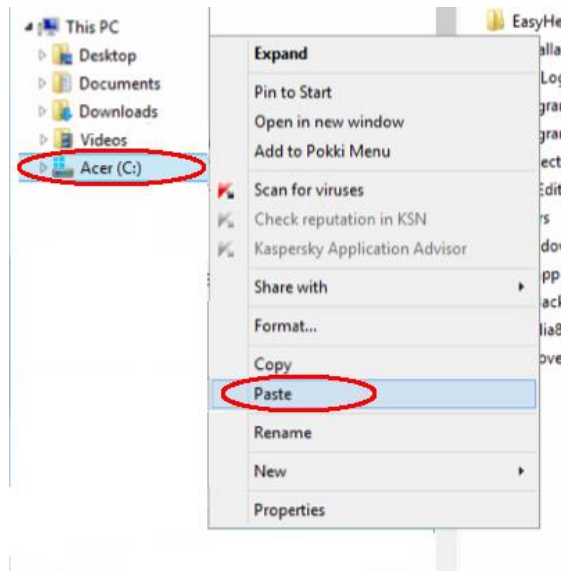

- Select the installation's storage location (normally C:).
  - Confirm your action with **[Yes]**.

- The AdmiCash data is now transferred to the chosen drive into the AdmiCash folder.
- The next step is creating a copy of the entire AdmiCash installation, on an external storage medium, e.g. a USB stick:
  - Close AdmiCash.
  - Connect the external storage medium to the original PC/System and open the explorer drive C:.
  - Right-click on the AdmiCash folder and choose the position **Copy** from the menu.

- Open the storage medium and paste the entire folder with the same menu. (**Right-click – Paste**).
  - As soon as the copy process is completed, eject the storage medium by right-clicking on it in the explorer and choosing the position **Eject** from the right-click menu.
- The next step is transmitting your data to the new device:
- Connect the medium with the new PC/System and open the file explorer.
  - Right-click on AdmiCash and choose the position **Copy** from the menu.
  - Open the drive **C:** and **Paste** the same folder here.

Before using AdmiCash on a new PC or system, do install the latest update. The update creates the AdmiCash icon on your desktop and the according entries into the program folder. Beside that the uninstall information is added to the control panel. For the update, open our homepage [www.admicash.swiss](http://www.admicash.swiss) in the section **Download**. Download and install it on your computer.

With this last step you have completed the transmission of your AdmiCash installation to a new PC. You can now carry on working with it as before.

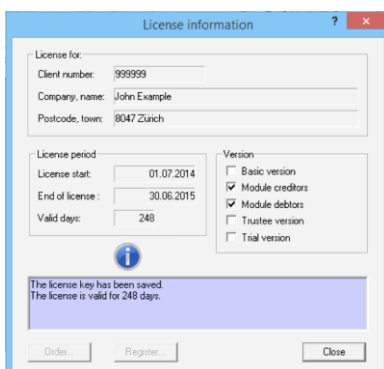

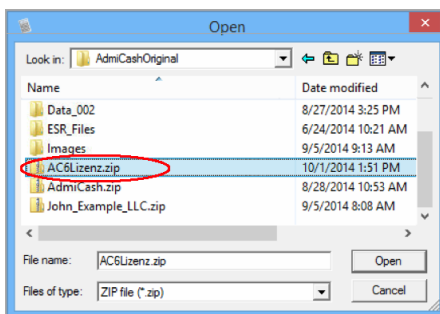

If you want to save your wish to save your data on a different drive, perform the same steps as before, to move it to another storage location (Menu **Company – AdmiCash setup – Set data drive**).

## License restoration on the new device/system

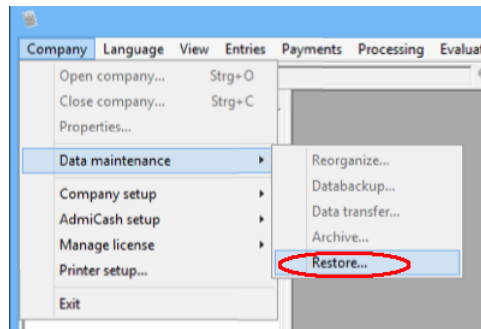

This variant is to be chosen if the original PC/Mac is **no more available or functional**. The first step is installing AdmiCash on the new device, followed by the restoration of your personal AdmiCash license. The final step is the import of a current data backup, which means this variant assumes that an according data backup has been created previously when the original computer was still available.

Perform the following steps to restore your AdmiCash license on the new device:

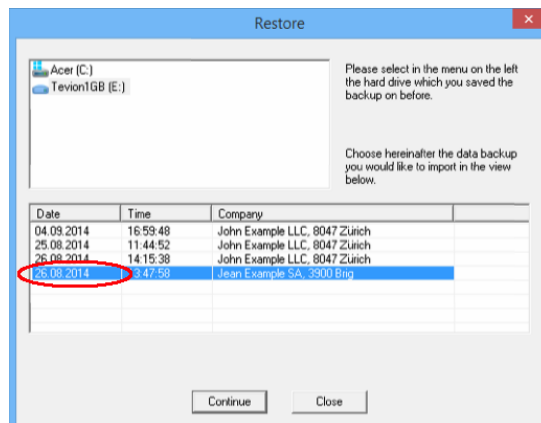

- Open our homepage in the section [Download](#). Download the trial version of AdmiCash and install it on your new computer.
- Send an email to [support@admicash.ch](mailto:support@admicash.ch) with the following content:
  - **Subject:** License file
  - **Text:** Your AdmiCash license number (or name and town, if the number is unavailable)
- Please send the email with the exact content mentioned above. These emails are processed automatically by a license server. Whenever no definite assignment can be made, delays in the delivery of your license file may occur.
- You receive an email containing the license file. Save the file named **AC6Lizenz.zip** in the folder **c:\admicash**.
- Start AdmiCash. The dialogue "Trial license" is now displayed. Please close it without making any changes.
- Open the menu **Company – Manage License – Restore license**.
- Choose the file **AC6Lizenz.zip** in the dialogue "Open".

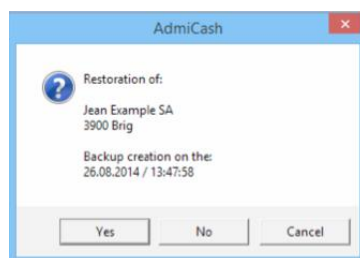

- The restoration is hereby finished. The license is now being restored and the according license information is displayed.
- Please import now the latest data backup available.
  - Connect the medium containing the backup with your new computer.
  - Open AdmiCash and choose the menu **Company – Data maintenance – Restore**.

- Select here the latest data backup.

- Confirm the safety question with **[Yes]**.

With this last step the transmission of AdmiCash to the new computer is complete. You can now continue working with AdmiCash like before.

**The license restoration cannot be used for the multiple installation of the program!  
Every AdmiCash license is only valid for one installation.**
